

Additional Borrowing

Interest Rates

Here you can find:

- Cash reserve facility withdrawal interest rates (flexible product options only)
- Further advance interest rates

A fixed interest rate will be applied to each cash reserve facility withdrawal or further advance, based on the prevailing interest rate on the product at the time you apply. This interest rate may be higher or lower than the interest rate which applied to your initial advance.

A cash reserve facility's amount is fixed before the outset of the mortgage, and is based on the historic LTV of the product that was secured initially at loan completion. The amount available for a further advance will be capped at the prevailing LTV at the time a customer chooses to apply. This LTV may be higher or lower than the LTV available today.

Each time you apply for additional borrowing, we will send you an offer which will advise on the current interest rate. Please speak to our team for further information.

The rates which apply to both cash reserve facility withdrawals and further advances are listed below.

These rates are correct as of 25th April 2024.
