## HOW CAN IT HELP ME?

Nobody wants to think about dying. But it's worth thinking about how your family would cope if the worst happens.

Losing a family member is emotionally devastating, but the loss of income can be just as devastating for your family's finances. Mortgage repayments, funeral costs, childcare – the extra costs can be overwhelming.

Life insurance provides a cash payout to your family if you die. It's a financial safety net that protects your family if the worst happens.
